

Commercial Facilities & Logistics

Special Products Popularity on the Rise

What is a special product?

A product that performs more than one function is deemed to be a special product.

Forms with integrated cards, Documents with higher degrees of security and similar products are all seen as special products by Commercial Facilities & Logistics.

Having been suppliers of special products for a number of years **CFL** have identified a large increase in the possibilities of these products.

DEMAND

As demand for more basic print has declined with the introduction of email and laser printers the need for flexible products has risen sharply. Fortunately with our large range of trade suppliers **CFL** have been able to keep up with this demand and offer our customers the most useful and up-to-date solutions to their print requirements.

SPECIAL PRODUCTS

These products are normally very efficient and cost effective.

Whilst possibly offering a higher degree of security or a fully integrated form.

It could be a pin mailer or a letter with a tear off reply slip.

Corporate merchandising is also very popular and with **CFL's** contacts we can supply a full range from mouse mats to polo shirts, baseball caps to golf balls.

Your requirement is our challenge.

April will soon be here. If you have a need for short/long run printing of accounts brochures or reports we can deliver the goods.

If personalised tax returns are your requirement then look no further than **CFL**.

CFL can supply any printed requirement in any format, Black on white, four colour, digital, lithographic etc.
