

## Commercial Facilities & Logistics

# *Despatch From CFL*

Following a successful operation with several customers **CFL** are looking to sell their despatch services to their full customer base.

The service allows organisations to hold stock at **CFL** and order their products as and when they required. Once **CFL** receive the order it can immediately be processed and the goods despatched for next day delivery. Stock reports are available at the touch of a button and orders can also be tracked to check on their location.

### **COMPUTERISED**

A fully computerised stock control system monitors stock levels and advises when stock is low. Emailed or faxed orders are entered onto the system and individual delivery notes and despatch labels produced for each order. The goods are packed and despatched for next day delivery.

The computerised system allows the customer to be aware of stock levels at all times and the status of orders.

### **SUCCESS**

Having proved very successful for over three years with one national company and several short-term projects where customers could not cope with their own requirements, **CFL** feel that this highly valued service could prove useful to a number of organisations. By holding stock on-site **CFL** are able to despatch goods as required in response to customer requests.

This is proving an extremely useful service and is growing very popular.
