

## Commercial Facilities & Logistics

# Capture our Services

**D**o you have a number of contacts whose needs you wish to understand more clearly?

At **CFL** we provide a data capture facility that can identify answers to this question and more. By inputting data from your sources into a database it is possible to easily identify trends and positive responses.

### CREATE

If you just want to create a database for mailings we can assist in this. Inputting the names and addresses and then mail merging into your documents and posting. The postal address could be selected by a chosen post code area or a specific response to a question.

### FLEXIBLE

The flexibility of the system has to be seen to be believed and you can be sure of some interesting results.

If you have a file of records that need checking for whatever reason then again we have the resources to assist in this. If you would like your postal records updated we have the technology. Our address verification tool uses Royal Mail PAF files to ensure that all addresses have the correct post code and mailsort codes. It can also correct STD codes where they may have changed.

So whatever your needs, even if you're not sure if we could help, try us first.

## **Pick, Pack, Storage and Despatch**

Store your goods on **CFL's** premises, have them individually picked and packed to your specification and then despatched for next day delivery. We can cope with any combination of products; packed to your requirements and despatched by any method you feel most appropriate or take advantage of the close links we have with a national courier and Royal Mail.

## **Mileage Charts**

We have facilities here at CFL to provide you with accurate mileage information. If you have a number of retail outlets and wish to advise customers of their nearest store then we have the program for you. This system runs just from the knowledge of the customers postcode. Contact us for more information.

## **Sorry to mention it again!**

Christmas is drawing even closer. Don't forget the time and hassle saving product available from Commercial Facilities & Logistics. Cards designed to meet your specification, personalised to your address list and digitally signed. There needs to be NO work done by you. Addresses can be printed on the card, inserted into envelopes and posted. Don't delay, get this hassle sorted now.

We also have a selection of base cards that could be overprinted with the basic Company details. Call us for a brochure.
